Website for Visualizing Recursion: https://recursion.vercel.app/

Code for running the 0-1 knapsack recursion:

```
def fn(n, s):
if n == 0 or s == 0:
    return 0
if w[n - 1] <= s:
    op1 = fn(n - 1, s - w[n - 1]) + v[n - 1]
    op2 = fn(n - 1, s)
    return max(op1, op2)
else:
    return fn(n - 1, s)</pre>
```
